

Abstract – Andriana Rout

Evaluating oral production

The goal of this English language workshop is to learn the criteria needed in order to assess pupil's language production in relationship to the specific levels of the CEF. Video examples of oral performances by pupils at various levels of the CEF will be shown, analysed and evaluated.

In the context of current discourses relating to valid, reliable, objective and practical methods of evaluating oral communication, this workshop focuses on the use of standardized testing and evaluating techniques.
